

## SMART METERS MAKE YOU SICK

In 2011 the World Health Organisation's IARC (International Agency for Research on Cancer) classified the radiofrequency (RF) radiation used in 'smart' meters as a **Class 2B Possible Carcinogen**. These meters emit much more frequently and at much higher levels of radiation than power companies admit, and New Zealand 'smart' meters use exactly the same technology.

- 1 We Don't Need Your 'Smart' Meters (2:29)
- 2 Fact Sheet (1:55)
- 3 The Lies They Tell (3:44)
- 4 Bad Idea (2:15)

*"Quite a number of the people objecting to smart meters who have contacted the Commission have said that Radio Frequency Electromagnetic Radiation being transmitted over their property by or for their electricity provider poses health risks that they should not be exposed to."* - Robert Hallowell (Official Information Act Officer) NZ Human Rights Commission

## SMART METERS CAUSE HOUSE FIRES

'Smart' meters are prone to explode during power surges, causing many house fires. This is in fact the main reason they are being withdrawn by the 100,000 in America, Canada and Europe, as emergency services everywhere are being stretched to the limit in coping with this completely avoidable and unnecessary crisis.

## SMART METERS INVADE PRIVACY

The Office of the Privacy Commissioner (NZ) has expressed serious concern over potential misuse of private data collected with 'smart' meters. Power companies have been caught selling clients' private information to third parties for profit. The implications are alarming but you don't have to give up your privacy to a private company. People around the world are demanding the right to informed choice.

You have the fundamental right to protect the health of your family.

## SMART METERS COST YOU MONEY

It is claimed that 'smart' meters will reduce costs by allowing us to monitor our power usage. In Toronto 80% of customers had higher power bills after 'smart' meters were installed. The Daily Mail reported hundreds of thousands of 'smart' meter billing issues in the UK, and a lack of responsibility from power companies.

Your only 'protection' is your contract with your private energy provider. Insist on the right to SAY NO TO 'SMART' METERS.

#### We Don't Need Yr 'Smart' Meters

(Hugh Kansayno)

We don't need yr 'smart' meters, we don't need the lies that you feed us  
You can't tell us that they're safe, like sticking your head in a microwave  
We don't need yr 'smart' meters, we don't need the lies that you feed us  
You can't tell us that they're great, day and night they radiate

#### Fact Sheet

(Hugh Kansayno)

Worrying about the world today  
It seems the common people have got no say  
Just when you thought it couldn't get much worse  
They're putting in 'smart' meters what a curse  
Poisoning the nation with wireless radiation

Till we're no longer safe in our homes

Then along came a corporate fact sheet  
To explain that everything's fine  
Don't worry, says the corporate fact sheet  
What we're doing is safe, it's all in your mind  
We're happy with our corporate fact sheet  
Educating us back into line

It's all there on the corporate fact sheet  
As long as you don't read between the lines

When we sat down to read the actual words  
We didn't find much independent research  
This crazy radiating surveillance device  
Is making people sick which is not very nice  
When the World Health Organisation  
Says wireless radiation is possibly carcinogenic  
It's probably worse

You can keep your corporate fact sheet  
It's full of lies from the front to the back  
Whoever wrote this corporate fact sheet  
Has a lot to explain, they should get the sack

It's a crime in a corporate fact sheet  
To pull the wool over good people's eyes  
You can't call it a corporate fact sheet  
When it's full of distortions and straight out lies  
It's bullshit, it's corporate bullshit  
It's bullshit, bullshit, bullshit

#### The Lies They Tell

(Hugh Kansayno)

We've got a little gift for you, as a valued client  
Anyhow it isn't up to you  
You can't decline it  
If you won't take, one now  
While they're still free  
You'll have to pay for one  
When they're compulsory  
CHORUS: These are the lies they tell  
Why don't they go to hell  
These are the lies they tell  
Why don't they go to hell  
These are the lies, so many lies

Your 'smart' meter radiates your home  
But only for a minute

The signal's weaker than a phone, there's nothing in it  
We'd never sell your privacy for profit or power  
We'd never push you off the grid  
From our ivory tower  
Repeat CH  
Your 'smart' meter won't explode or burn, it's been thoroughly tested  
Some people raved a few concerns but they've been arrested. Anyone still want to pick a fight?  
We'll send the trolls out  
We are well within our legal rights  
To enforce the roll-out  
Repeat CH: These are the lies, so many lies, these are the lies

#### Bad Idea

(Hugh Kansayno)

CHORUS: Smart meters are a very bad idea cause they'll ruin your health  
And invade your privacy  
They're known to cause house fires  
So it's time to take a stand  
They'll put your power prices up, it's time to get them banned

Ladies and gentlemen, roll up and roll out the incredible 'smart' meter circus!  
We present the threatening logic and terrifying acts of stupidity!!

Be dazzled by the smoke and mirrors of PR spin!!

Repeat CH

Be amazed as your health disintegrates and your power bills skyrocket before your very eyes!!  
Watch 'smart' meters explode in spectacular showers of fireworks!!

Squirmy while your secrets are exposed by greedy corporations!

CH: ... dangerous idea ...

Stand aghast in horror as all your friends become discombobulated by this outrageous scam!!!!!!

Repeat CH

They'll put your power prices up, it's time to get them banned
